Projects

TeamX – Multi-Tenant SaaS Platform | Java, Spring Boot, MySQL, React.js

- Architected a multi-tenant SaaS platform with strict data isolation, RBAC (Org Admin, Manager, User), and secure permission-driven workflows
- Designed a scalable tenant-aware database schema applying real-world SaaS patterns including shared schema design and access boundary enforcement

Jammi – AI Career Copilot (End-to-End System) | Python, FastAPI, React, MySQL, LLM APIs

- Built an AI-powered platform for resume analysis, ATS compatibility scoring, and actionable improvement suggestions using pre-trained LLMs
- Implemented an AI-driven interview simulator generating domain-specific questions and evaluating responses with structured feedback
- Designed a skill gap detection system using embeddings and similarity matching, with a responsive dashboard for real-time insights

Achievements

- Ranked #1 at institute level on GeeksforGeeks among all active student profiles
- Solved 500+ coding problems across GeeksforGeeks and LeetCode, covering arrays, trees, graphs, DP, and more
- Finalist – PU Code Hackathon 3.0, organized by Parul University (Jan 2026) – competed among top teams in a 2-day coding event

Certifications

- SQL (Advanced) – HackerRank
- CRUD Operations in MongoDB – MongoDB University
- Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle
- Oracle AI Vector Search Certified Professional – Oracle
- Computer Networks and Internet Protocol – IIT Kharagpur (NPTEL)
